SUMMARY

Motivated and detail-oriented Computer Engineering student with strong foundations in software development, AI, and backend engineering. Passionate about building scalable applications using Python, modern web technologies, and machine learning. Seeking an internship to apply technical skills, solve real-world problems, and contribute to impactful projects.

EDUCATION

Modern Education Society's Wadia College of Engineering, Pune
Savitribai Phule Pune University
B.E. in Computer Engineering (Pune, India)

2023 – 2027
CGPA: 8.44/10

PROJECTS

ASTRA | AI & Cybersecurity

[GitHub](#)

- Engineered an asynchronous task orchestrator using Python's ThreadPoolExecutor to manage 4+ security scanners concurrently, increasing total scan throughput by 4x.
- Developed a multi-agent workflow consisting of a Dynamic Scan Agent that autonomously recommends tools based on real-time findings and an Attack Path Engine that utilizes Neo4j to map cyber-kill chains.
- Integrated Google ADK and ChromaDB into a Retrieval-Augmented Generation (RAG) system to automate context-aware security fixes and power an interactive security assistant for real-time analysis of 100+ vulnerability data points.

MEET ASSISTANT | AI & Automation

[GitHub](#)

- Automated a bot to join meetings via links, capturing screenshots and syncing slide-specific captions.
- Ingested synchronized captions and slides into ChromaDB to power a context-aware Gemini RAG chatbot system.
- Deployed an agent to answer user queries, respond to tags, and trigger mobile notifications.

TECHNICAL SKILLS

- Programming:** C, C++, Python, HTML, CSS, Javascript, SQL.
- Tools:** Git/Github, CI/CD, Docker, Render, LangSmith, Openrouter, Google AI studio.
- AI Agents & ML:** LangChain, LangGraph, Google ADK, Gemini API, Prompt Engineering.
- Core Concepts:** DSA, OOP, Artificial Intelligence, Computer Networks, Operating Systems, Distributed Systems.
- Backend:** Fastapi, Flask, RESTful API, Pydantic, SQLAlchemy, Socket Programming, SSE
- Databases:** SQL(MySQL, PostgreSQL), NOSQL(MongoDB), Neo4j, ChromaDB.

ACHIEVEMENTS & CERTIFICATION

- [Codeforces](#) Specialist (Max **1408**), [CodeChef](#) 3★ (Max **1625**), [LeetCode](#) Rating **1545**, ICPC Amritapuri Preliminary Round Rank **1612/2930**.
- Won [Second](#) Prize at WOWVERSE x MESCOE for showcasing ASTRA.
- Reached the Finals of the [VELORA](#) Hackathon, showcasing an AI-based IoT Device Scanner.
- Reached the Semi-Finals of the Google Developer Clubs Build & Grow Hackathon, Pune.
- Completed "[The Complete Python Developer](#)" certification covering backend, automation and machine learning.

POSITIONS OF RESPONSIBILITY

Technical Team Member | CodeStorm Club

June 2025 – June 2026

- Conducted technical bootcamps on C++ STL and Data Structures, helping peers overcome fear of complex algorithms.
- Identified logical errors and taught debugging techniques to improve participant code quality.
- Designed algorithmic problems that test logic building and edge-case handling for college-level contests.
